EVAN DEAVER

Data Analyst | Business Intelligence | AI Data Quality

Remote, US | edeaver06@gmail.com | GitHub Portfolio | LinkedIn | Tableau | Kaggle

PROFESSIONAL SUMMARY

Google-certified Data Analyst working in SQL, Python, R, and Excel. Builds tested SQL pipelines, publishes Tableau dashboards, checks models for flaws such as target leakage, and performs data QA on AI model outputs.

TECHNICAL SKILLS

- **Languages & Querying:** SQL (Google BigQuery, PostgreSQL), Python (Pandas), R (Tidyverse, ggplot2, caret), Advanced Excel (Pivot Tables, Power Query, XLOOKUP)
- **BI & Visualization:** Tableau (Tableau Public), Power BI, Dashboards, Metric Reporting
- **Data Quality & AI Operations:** Data Validation & Reconciliation, Anomaly Detection, Automated Testing, Human-in-the-Loop (HITL) Model Evaluation, Multimodal Data Annotation

FEATURED ANALYTICS PROJECTS

Olist E-Commerce Delivery & Reviews Analysis | SQL, Python, automated tests

- **Question & Data:** How does late delivery affect customer review scores? Analyzed 99,441 orders from the Olist e-commerce dataset.
- **Method & Result:** Built a SQL pipeline to prepare order, delivery, and review data for analysis, and verified it with an automated test suite of 70 passing tests.

Audit Risk Model: Target Leakage Case Study | R, Random Forest

- **Question & Data:** Is a Random Forest model's reported accuracy on 775 audit records trustworthy? The original model's 97.8% out-of-bag accuracy looked strong.
- **Method & Result:** Identified target leakage: the label (Audit_Risk > 1) was derived from an input feature, so the 97.8% was invalid. Rebuilt the model on the 7 raw inputs, compared it against a 60.6% majority-class baseline, and showed high accuracy is expected because the label is a deterministic scoring rule.

Tableau Public Dashboards | Tableau Public

- **Question & Data:** How can public datasets be made easy to explore for a general audience? Built dashboards on CO2 emissions, Google Fiber, World Happiness, Global IQ, and AI-vs-human scam text.
- **Method & Result:** Published 6 dashboards on Tableau Public, featuring CO2 Emissions and Google Fiber.

Google Fiber FCR Analysis | Python, automated tests

- **Question, Method & Result:** Analyzed Google Fiber first contact resolution (FCR) in Python, with the analysis code covered by 3 passing tests.

PROFESSIONAL EXPERIENCE

AI Data Annotator & Model Evaluator | Outlier.ai | 2025 – Present

- Perform data QA on Large Language Model (LLM) outputs on the Aether platform, auditing them for factual accuracy, safety compliance, and prompt instruction adherence.
- Classify defects using an error taxonomy, write qualitative reviews, and annotate multimodal text and vision data to improve model quality.

E-Commerce & Digital Storefront Operations | Self-Employed | 2003 – Present

- Manage multi-channel online sales, catalog management, pricing, and order fulfillment across digital marketplace platforms.
- Track inventory turnover across 200+ active listings in Advanced Excel and streamline shipping logistics.

ADDITIONAL EXPERIENCE

- **Personal Shopper / Fulfillment | Instacart** — Executed order selection, inventory substitution, and last-mile fulfillment with high customer rating averages.
- **Substitute Teacher | Rapid City Area Schools (2011–2014, 2018–2021)** — Adapted to daily instructional assignments and managed classroom records.

EDUCATION & CERTIFICATIONS

- **Bachelor of General Studies (Emphases: Business, Sociology, Education)** | Black Hills State University (2015)
- **Google Professional Certificates:** Data Analytics (2025), Business Intelligence (2026), AI (2026)
- **Kaggle Certificates:** Intro to Machine Learning (2026), Python (2026)
