EVAN DEAVER

Data Analyst | Business Intelligence | SQL, Python, R, Tableau

United States | edeaver06@gmail.com | Portfolio: github.com/edeaver06/Data_Analytics_Portfolio | LinkedIn | Tableau | Kaggle

PROFESSIONAL SUMMARY

Data analyst with the Google Data Analytics and Google Business Intelligence certificates, working in SQL, Python, R, Tableau, Google Sheets and Excel. Builds tested data pipelines (DuckDB, dbt, pytest), measures forecast accuracy, and publishes 6 interactive Streamlit apps plus Tableau and Google Sheets dashboards.

TECHNICAL SKILLS

- **Languages & Querying:** SQL (Google BigQuery, DuckDB, SQLite), Python (pandas, pytest), R (Tidyverse, ggplot2, testthat), Excel (pivot tables, formulas)
- **BI & Visualization:** Tableau (Tableau Public), Streamlit, Google Sheets dashboards, Metric Reporting
- **Data Quality:** Data Validation & Reconciliation, Anomaly Detection, Automated Testing (pytest, testthat)
- **Pipelines & Forecast Scoring:** dbt, DuckDB, REST APIs (Polymarket, Kalshi, EIA), Brier Scores

FEATURED ANALYTICS PROJECTS

Diabetes Care Gaps: Care-Gap KPI Tracker | R, SQL, testthat | synthetic data, no real patients

- In 779 synthetic adults with diabetes, 5 of 7 HEDIS-style measures missed their 2025 target (HbA1c control 48.5% vs a 60% illustrative target), and 672 patients still have at least one open care gap in 2026 so far.
- Built the pipeline in R with testthat tests, then rechecked all 770 KPI rows in independent SQL with 0 mismatches. Flagged 264 patients whose only HbA1c results were implausible (below 4%); counting them would have shown 82.4% control instead of 48.5%.

Rural Hospital Financial Warning Signs | Python, SQLite, Google Sheets | Dashboard

- Screened 4,284 hospitals from CMS FY2023 cost reports; 6.6% of the 485 in SD, ND, MN, NE, MT, WY and IA show 4 or more of 6 financial warning signs.

Steam Pulse: What Keeps a Game Alive? | Python, DuckDB, dbt, Streamlit | Live App

- Built to run on a schedule, with an interactive live Streamlit app: a Python and dbt pipeline on DuckDB tracks players, prices, reviews and tags for about 1,000 of the most-owned Steam games, with 65 passing dbt tests.
- In a snapshot on Oct 12, 2026, 6.22M players across 1,029 games: the top 10 games held 40.1% of players, and games had about 44% fewer players a month after their launch month.

More projects with apps: US Electricity Price Tracker, Olist E-Commerce, Markets vs Polls, Is the Market's Closing Price an Accurate Forecast?, Google Fiber FCR, Aircraft Readiness; Tableau dashboards and code: Portfolio

PROFESSIONAL EXPERIENCE

E-Commerce & Digital Storefront Operations | Self-Employed | 2003 to Present

- Manage multi-channel online sales, catalog management, pricing, and order fulfillment across digital marketplace platforms.
- Track inventory in Microsoft Excel and handle packing and shipping.

Data Annotator | Outlier.ai | 2025 to Present

- Check large language model (LLM) outputs for factual accuracy, safety compliance, and whether they follow the prompt.
- Classify defects using an error taxonomy and write short written reviews.

ADDITIONAL EXPERIENCE

- **Personal Shopper / Fulfillment | Instacart | 2020 to Present**: Executed order selection, inventory substitution, and last-mile fulfillment with high customer rating averages.
- **Substitute Teacher | Rapid City Area Schools (2011 to 2014, 2018 to 2021)**: Adapted to daily instructional assignments and managed classroom records.

EDUCATION & CERTIFICATIONS

- **Bachelor of General Studies (Emphases: Business, Social Science, Education)** | Black Hills State University (2015)
- **Google Professional Certificates:** Data Analytics (2025), Business Intelligence (2026)
